An exchange answers the question "Do Hogs Pay?" in the following manner: "Our experience is they do not. They usually sponge the paper from some neighbor or sneak around to some store and read it and then kick because the editor did not waste a lot of good white space in telling an anxious public what a prominent citizen he is. This same kind of a hog has been known to advertise in a paper and refuse to pay his bills, or take the paper for several years and then chuck it back into the postoffice marked 'refused' and imagine he paid the bill. The same class of hog often belong to the church and the poor widow pays the preacher more on salary than they does."

SUN FLOWER.

"Rats" Made It Easy for Him.

A man, who not long ago made more than \$1,000,000 in a steel deal, was telling a group of friends in a New York hotel the other day, his experience in Paris last summer, "A friend of mine," said he, "who was a learned statesman from Washington, left the hotel where we were staying, and sallied forth in search of adventure. As he walked along the Rue de Rivoli it occurred to him that he much desired a copy of a certain American weekly. Noticing a kiosk on the next corner, he approached the proprietor. Naturally he supposed the man was a Frenchman, and racked his memory for enough French to make know his wants. But, sad to say, all he could think of were a few commonly used phrases. He tried one or two German expressions, but the man, in French, evidently explained that he could not understand. A couple of Italian expressions and a little stray Russian also failed. All this time the man had listened patiently. Finally my friend gave it up, remarking in disgust to himself, 'Oh, rats! The newspaper man's face brightened immediately as he said in English: 'Say, mister, what the duce do you want, anyway? The confusion of my dignified friend was intense as he listened to the remarks of the man, who used to sell papers on New York's Bowery."
